

The Week Ahead

Blog: Sunflower Power!

Sunflowers, a symbolism of strong loyalty, are known to be tough and sturdy, and they come in all shapes, colors, sizes, and uses! But did you know that there is toxin found in all parts of the sunflower? They are allelopathic!

Read the full blog post, 'Sunflower Power!' on our blog page on Monday!

Also check out last week's blog post, '[Where Do Our Nursery Plants Go?](#)'

Native Plant Nursery

We grow native plants year-round at LandHealth Institute's very own Plant Nursery! At our location in West Parkside, you can find everything from grasses to perennial flowers. Check out our website to view our plant catalog and for more info on how to set up an appointment to buy plants or just to come by and pay us a visit. Find more info [here](#).

Student Program: Program for Future Environmental Scientists and Stewards (ProFESS)

ProFESS Watershed Stewards completed their final session of the summer program. Last week, the students celebrated their accomplishments and

shared their reflections of their experiences at our Graduation Celebration. We're excited to keep exploring with more fun outdoors events in the fall - including kayaking, canoeing, hiking, and more! View our ProFESS 2021 highlights page [here](#).

Interested in supporting LandHealth? We welcome you to do that [here](#)!
